Toxicity: Quantitative data on toxicological effects is not available for this product.

Potential health effect:

On the skin: May have an irritating effect on moist skin (due to transpiration or humidity) after prolonged contact. Prolonged skin contact with wet cement or fresh concrete may cause serious burns because they develop without pain being felt. Repeated skin contact with wet cement may cause contact dermatitis

On the eye: Short-term exposure, Irritating. Long-term exposure, irritating may cause inflammation of the cornea. Eye contact with cement (dry or wet) may cause serious and potentially irreversible injuries.

Inhalation: Short-term exposure, irritating. Long-term exposure may cause inflammation of lining of the respiratory system.

Ingestion: Swallowing large quantities may cause irritation to the gastrointestinal tract.

Additional toxicological information:

When used and handled according to specifications, the product does not have any harmful effects.
